In this lesson, you are going to watch a video about the best programming languages. You will learn new words and phrases, improve your listening skill and practice describing a language.
This lesson will help you participate in tech discussions at work, or during a job interview when someone asks “Why did you choose this programming language”
The video is quite long, but I suggest you watch it in parts.

Let’s go!!!!

1. What programming languages do you know? Do you use any of them for work?

2. Match the word with the meaning

1. to pick up	a) unusual or weird
2. a tie	b) assumed as a result of estimation.
3. inferred	c) capable of making an error
4. error-prone	d) using or containing more words than are necessary
5. funky	e) to get a new skill or learn smth by practising
6. to get unstuck	f) the process of using bots to extract content and data from a website.
7. to pop up	g) short and clear, expressing what needs to be said without unnecessary words
8. to scrape	h) to be able to continue your work or task because you found out how to do it or got help
9. concise	i) to appear or happen, especially suddenly or unexpectedly
10. verbose	g) to make or have an equal score in a contest.

3. Watch the video part 1. What are the 2 programming languages that the author thinks are the best? (to 2.03)

The BEST Programming Language To Learn In 2022

4. Tick the criteria that are used to compare languages in the video?

community	☐
the age of the language	☐
ease of use	☐
the number of frameworks	☐
real-world application	☐

5. Put the words in the box into the sentences.

pick up	**scrape**	**getting unstuck**	**funky**	**popping up**

1. With Python, you can easily …… websites.

2. He is a skilled Engineer so it is really easy for him to ….. any new technology or framework.

3. There are so many free blogs and tutorials and videos all over the internet so ……. is pretty easy.

4. There are no ……behaviour operations in Python, the code just does what it is supposed to.

5. Every week or so I see some new framework …….for Javascript or Python and the fact that there's continuous innovation is a very promising sign.

6. Watch the second part of the video. What language is the winner?

The BEST Programming Language To Learn In 2022

7. Read the sentences. Decide if they are True or False.

1) Both JS and Python are typed languages.
2) It is pretty easy to get stuck in Javascript.
3) In Javascript syntax is super intuitive and it reads like English
4) Both Python and JS are mature languages with strong communities.
5) Dropbox is famous for developing in Python and they open-sourced mypy which is like a type checker.
6) Javascript is really strong when it comes to scripting and data science.
7) Python is extremely concise, the same program in Java that would take a hundred lines might only need three or four in Python.
8) With JS you can create full-stack applications.

8. Think about the programming language you are using or learning. Describe it, think about how easy to use it, community and documentation, syntax, and real-world application. Write 4-5 sentences about this programming language.
